TECHNICAL SKILLS

- Technical Support: Tier 2 Escalations, Root Cause Analysis (RCA), Bug Reporting, Device Evaluation.
- Programming & Data: SQL, Swift, C++, Java, Objective-C, phpMyAdmin.
- Software & Tools: Zendesk, Spiceworks, Xcode, VS Code, FileMaker, Parallels, Cisco Webex.
- Platforms: Windows 10/11, macOS, iOS, Android, WordPress.

PROJECTS

QuickInvoice | iOS Development | Swift, SwiftUI, SwiftData

[GitHub](#)

- Developed a mobile invoicing solution tailored for non-technical users, focusing on high-efficiency UI/UX to minimize user friction
- Developed custom logic to dynamically convert user input and line-item data into professional PDF documents for external sharing
- Integrated SwiftData for seamless state management and local storage, ensuring 100% data persistence and high-speed query performance during real-time invoice generation

EXPERIENCE

IPCMOBILE | Irvine, CA

January 2021 - Present

Technical Support Specialist

- Lead technical point of contact for enterprise clients, performing deep-dive diagnostics and root-cause analysis on complex hardware/software failures
- Administered enterprise WordPress environments, managing user accounts, security roles, and permissions to ensure secure global access to developer resources.
- Managed multi-channel support queues (Zendesk/Spiceworks), consistently exceeding 24-hour SLA targets and maintaining a 95%+ customer satisfaction rating
- Maintained internal product and warranty databases using phpMyAdmin; executed weekly SQL-based data synchronizations to ensure 100% accuracy in device tracking
- Partnered with Engineering and QA teams to translate customer-reported bugs into actionable technical reports; led review calls to explain hardware diagnostics
- Directed onboarding and technical training sessions for new clients, reducing initial setup friction and increasing long-term product adoption
- Conducted hands-on device evaluations using Xcode and VS Code environments to identify software-hardware interface bugs, providing telemetry to development teams

IPCMOBILE | Irvine, CA

May 2017 - January 2021

Production Supervisor

- Managed the configuration and technical rework of hardware subassemblies, ensuring 100% compliance with technical specifications and enterprise quality standards
- Developed detailed technical guides and build-checklists (SOPs) that served as the foundational knowledge base for production and hardware support teams
- Collaborated directly with Engineering and QA departments to investigate hardware failures during the assembly phase, assisting in the resolution of production bottlenecks

EDUCATION

CALIFORNIA STATE UNIVERSITY FULLERTON

May 2027

Bachelor of Science in Computer Science

SANTA ANA COLLEGE

June 2024

Associate of Science in Computer Science (HONORS)
